

TG High-Pressure Cleaning Aquajet

TGQ2026	
Operating range	50-200MM
Engine	Gasoline engine (15hp)
Pump	2900PSI/26 LPM
HP hose	30M 1/4 hose
Weight	140KG
Nozzle	Two 1/4 sewer nozzles
Size	1 water gun / 4 water gun nozzles 30M high pressure hose 2m inlet pipe / 2 sewer nozzles

TGQ2026

The TGQ2026 mobile high-pressure injector is equipped with a control engine to ensure optimal cleaning of small drainage ditches and sewers up to 200mm. This machine is particularly suitable for spraying and cleaning house connections, roof drains, grease clogged sewers, and industrial sewers. It also cleans street furniture and terraces very effectively.

TGQ2026 can be directly connected to the water supply system, eliminating the need for a separate water tank. TGQ25022 is equipped with two nozzles and a high-pressure gun with a spray gun.

Standard Configuration

Water Canon

Accessory

Dredging Nozzle

Inlet pipe +
return pipe

TA High-Pressure Cleaning Aquajet

TAQ2820	
Operating range	50-200 MM
Engine	Lifan 16hp/Honda GX390 (13HP) / BRIGGS & STRATTON (13.5HP)
Pump	200 bar / 2900 PSI 22 LPM / 5.5 GPM
HP hose	30 meter 1/4 connector hose
Weight	130KG
Nozzle	Two 1/4 nozzles / Four water gun nozzles
Size	High Pressure Gun with 3m Suction Hose with Filter, Hose Reel

TAQ2820

TAQ mobile sewer cleaning machine is a new style independently developed. It uses a stainless steel water tank with a capacity of 17 gallons. Customized stainless steel exhaust using TAQJET. His biggest feature is that he can heat the water in the water tank through the engine's cyclic heating method, which takes about 30 minutes.

The high-pressure injector is equipped with a control engine to ensure optimal cleaning of small drainage ditches and sewers below 200mm. This machine is particularly suitable for spraying and cleaning house connections, roof drainage pipes, grease clogged sewers, and industrial sewers. It also cleans street furniture and terraces very effectively.

TAQ2820 can be directly connected to the water supply system without the need for a separate water tank. TAQ2820 is equipped with two nozzles and a high-pressure gun with a spray gun
