

TM High-Pressure Cleaning Aquajet

Gasoline engine

Small size and powerful, suitable for use by plumbers in entrepreneurship

Max 600mm

TB provides plumbers with a smaller volume that can be moved at any time to complete sewer cleaning operations, making it the first machine suitable for entrepreneurs.

230KG

Value for money

The selection of various engines, pumps, and water tanks enables BurrowTech to produce machines according to your specifications.

500 liters

The design of TB considers maintenance and has a movable cover that allows for easy access to the engine and pump for maintenance.

Remote control

Excellent ergonomic designThe steel pipe reel and control panel are installed at the optimal working height to provide you with maximum operating comfort.

High-pressure reel

TB comes in multiple configurations and can be enhanced with various options, such as radio remote control, skip injection system, and hydraulic hose reel drive.

TMJET

Sewer cleaning machine

TPQ2070

TPQ2070 is the most compact model in the TMJET Jetting series. 3000 PSI 7 BGPM available. The high-pressure hose reel can accommodate 164 feet of hose, helping you clean sewers and drainage ditches with diameters up to 13 inches/600MM. The 36HP professional horizontal shaft dual cylinder engine is designed specifically for high-power and high reliability applications. In this type of engine, oil is supplied to all moving components under pressure, providing better protection and efficiency. The engine is equipped with an advanced air filtration system that provides clean air, thereby affecting its performance and durability.

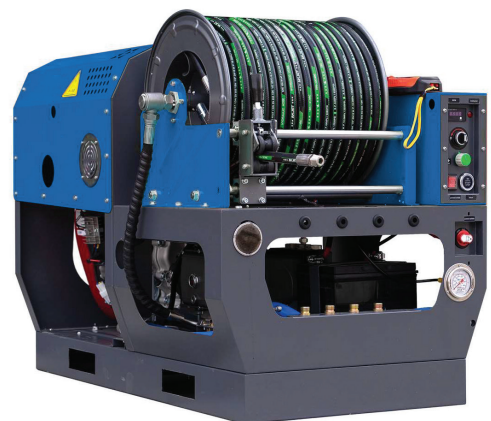

Standard Configuration

MODEL	 MAX FLOW		 MAX PRESSURE		 ENGINE POWER		 WEIGHT	 SHIPPING SIZE
	gpm	lpm	psi	bar	hp	cc	kg	cm
TPQ2070	17.5	70	2900	200	37	1000	230	112*90*66
TPQ3040	10	40	4350	300	37	1000	230	112*90*66
TPQ2050	12.5	50	2900	200	27	740	230	112*90*66

TMQ2070

TM is an upgraded version of the TP series. TM is equipped with a 6-channel radio transmitter for remote control in radio mode, as well as a wireless remote electric pipe rolling machine. No matter how tense your situation may be, TM can provide assistance for you. 3000 PSI 18.5 GPM available. The high-pressure hose reel can accommodate 164 feet of hose, helping you clean sewers and drainage ditches with a diameter of up to 13 inches/600mm.
