

PIC 6.0 PELI

Special axial head version

Our medium-sized inspection system – for pipes from DN70 – pre-equipped for pan-and-tilt head inspection. Ideal for renovation and refurbishment work as well as inspection of utility pipes! Sturdy and robust, yet easy to handle and carry thanks to the stainless steel reel cage on wheels.

With a large control unit incl. membrane keypad – in a removable hard case.

- Inspection system PIC 6.0 with PELI control unit, WITHOUT pan-and-tilt head – with PIC 5.5 axial head
- All requirements for pan-and-tilt head operation already integrated in this special version
- Pan-and-tilt head can be attached at any time

PIC 5.5 axial head:

- Stainless steel axial camera head, Ø 55 mm
- Automatic horizon compensation function
- Pressure-resistant up to 5 bar (optional)
- Navigates pipe bends from DN 90/87°
- Plug-in – can be changed in seconds
- Digital LED module 0.1 lux

Reel frame/reel cage:

- 70 m push rod Ø 9 mm with integrated camera cable (can be extended up to 100 m in length)
- Push rod guiding plate to prevent rod breakage
- Compatible with other interchangeable GEJOS camera heads (PIC 6.0 pan-and-tilt head, PIC 6.0 spherical mini head, PIC 3.0 axial head)
- Compatible with other interchangeable cages (PIC 5.5, PIC 3.0, PIC 1.9)
- Adjustable reel wheels for easy transport
- Accessory bag on the reel
- Vertically adjustable handle for transportation and attachment of the control unit (rotates through 360°)

PELI control unit:

- Control unit with 10" sunreflect monitor
- Detachable control unit in a rugged PELI case
- Data recording possible
- Display of meter value
- 128 GB internal hard disk storage (extendable)
- Wi-Fi capable (data transmission, updates)
- Keypad
- Video output
- Infinitely variable lighting control
- 220 V/50 Hz mains connection
- High-capacity LFP battery (a second battery can also be installed)
- Video recording and image storage
- 2 USB ports
- Pre-installed GEJOScan capture software (can be activated by phone/e-mail)
